

How to read these flows

Guyana Development Bank · Lending Platform · seven process maps

What these are

Seven swimlane maps covering the full lending journey. They show sequence and hand-offs between people. They are a companion to the Statement of Work, which holds the requirements. Where the two differ, the SOW governs.

Reading one map

Each horizontal band is one persona. A box sits in the band of whoever does that step. Arrows read left to right; an arrow that changes band is a hand-off to another person.

Shapes

Rectangle — a step. Hexagon — a decision. Red — an exception path. Dashed blue — an AI capability, delivered in Phase 2. Pill — the start or end of the journey. Dashed orange with ? — routing drawn as a best guess and not yet confirmed.

Capability tags

Every step carries a feature identifier in its top-right corner — F4.1, FA.5, C10.0. Each one is traceable to the requirement register in §11.2 of the SOW, so any step on any map can be followed through to the requirements that build it.

Two rules that explain most of what you see

One named human owns every credit decision — the Underwriter, and only the Underwriter. No other persona and no AI component decides credit. The person who created a case cannot approve it.

Access is scoped, not trusted. Region, sector and case assignment are enforced by the platform, which is why a step sits in one band and not another.

The seven maps

1 · Tier 1

SME Direct Loan, up to G\$3,000,000. Registration through disbursement.
6 lanes · 34 steps · C1 C2 C5 C6 C7

2 · Quick loan

Quick Loan, up to G\$300,000. The short path for informal sellers.
5 lanes · 27 steps · C1 C2 C5 C6 C7

3 · Cluster

Cluster and consortium formation. Head creates, members sign individually.
4 lanes · 18 steps · C4

4 · Servicing

After disbursement. Reconciliation, repayment, arrears, escalation.
5 lanes · 20 steps · C7 C8

5 · Discovery and registration

Before an application exists. Eligibility check, identity, business claim.
5 lanes · 20 steps · C1 C1

6 · Field operations

Agent-assisted origination, on-site verification, offline capture.
5 lanes · 22 steps · C3

7 · Administration

Product configuration, curriculum, audit, portfolio and governance reporting.
4 lanes · 18 steps · C9 C10

Exception paths

Fifty-seven exception paths are listed in the Requirements Specification. Sixteen are drawn on maps 1 to 4, where they carry the main risk. The rest are specified for build without being drawn, because drawing them would bury the main path. A path that is not drawn is still in scope.

Tier 1 – sole proprietor and incorporation

Up to G\$3,000,000 · 0% · no collateral

☐ Step — rectangle ☒ Decision — hexagon ☐ AI-assisted — dashed, Phase 2 ☐ Exception — red

Quick loan — informal seller

Up to G\$300,000 · 0% · photo and trading evidence · no business registration

Cluster and consortium formation

Applicant-initiated or facilitator-led. Roster, shared business plan, and mandatory training completed by each member in Coursera. Red steps are exception paths.

Servicing, repayment and monitoring

From disbursement reconciliation to arrears, field monitoring and escalation. Red steps are exception paths.

Discovery, registration and business identity

Applicant-led. Eligibility, e-ID and the fallback identity path, business-registry claim and new-venture declaration.

Field operations

Field-officer-led. Lead sourcing, agent-assisted capture, verification visits, offline sync, monitoring and escalation.

Administration and oversight

Platform admin, Finance department and Board. Access, configuration, portfolio reporting, audit trail and integration health.
